

**validaide**

*The Digital Cold Chain Management Platform*

### **Data-driven Lane Assessments**

Digitally document and manage your global distribution network with data-driven lane assessments based on handling capabilities and other data sources. Approve Lane SOPs and reevaluate the documentation based on a defined review period.

### **Supplier Management**

Digitally evaluate, manage, classify and approve subcontractors for pharma worldwide, based on a standardized checklist. Reevaluate suppliers based on a specified review period.

### **Logistics Capabilities Platform**

Access up-to-date information about supplier and location cargo handling capabilities from >300 LSPs (air, ocean, road). Every LSP defines and maintains its own data and shares it accordingly.

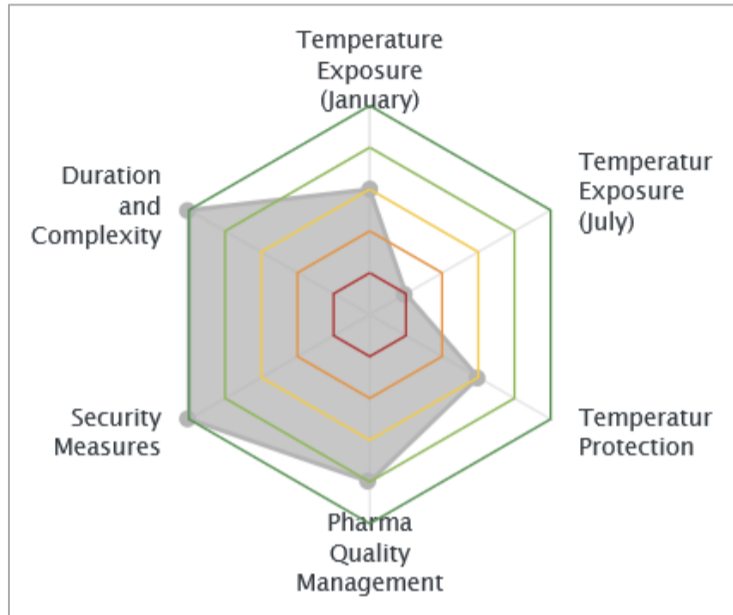

### **Ambient Temperature Profile**

Optimize packaging solutions based on predicted ambient temperature profiles of a lane for summer and winter conditions.
