

# Your Digital Platform for Lane Risk Assessments

Validaide

Do you want to create a more flexible supply chain with faster lane qualifications and improved product quality and safety?

## Validaide – Your Digital Platform for Lane Risk Assessments

Validaide offers the market-leading application to manage all your Lane Risk Assessments and Lane SOPs in one digital platform, ensuring easy access and compliance with regulatory guidelines. With our unique collaboration functionality you can easily work together with your logistics partners to create and approve Lane Risk Assessments in a consistent digital format.

Validaide provides a comprehensive software application designed according to pharmaceutical requirements for security and compliance with the following features:

-  **Data-Driven Lane Risk Assessments:** Create a complete insight into transport risk with a data-driven evaluation of temperature risk, quality risk and security risk.
-  **Combination of multiple data sources.** Integrate climate data, flight statistics and the pharmaceutical capabilities from more than 1200 logistics suppliers.
-  **Product details and shipment performance.** Customize Lane Risk Assessments by adding product thermal stability data and actual shipment performance.
-  **External integration.** Create a seamless flow from planning to execution by using our Lane Risk Assessments as input into other software applications.

*“Previously we had to manage hundreds of SOPs and Lane Risk Assessments in different formats, now we manage them all in one location, easy to access, easy to approve.”*

**Christian Doepke**  
Manager of Freight Global Solutions

## Planning, Execution and Compliance with confidence

By digitizing and consolidating your Lane Risk Assessments and Lane SOPs Validaide improves efficiencies in regulatory compliance, and enhances flexibility to respond to supply chain disruptions, ultimately improving product quality and safety.

Efficiency Gains in Regulatory Compliance

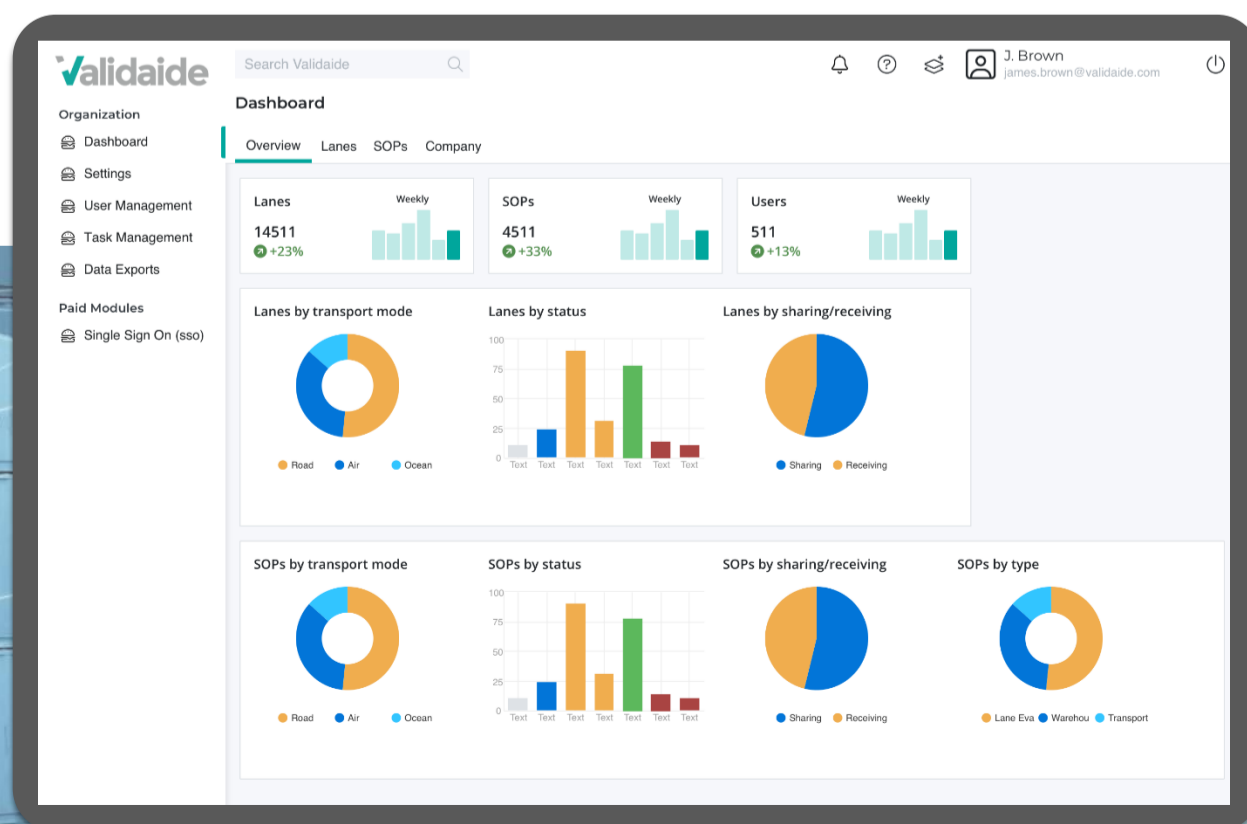

Increased flexibility with faster Lane Approvals

Improved Product Quality and Safety

With a consolidated digital platform Validaide may reduce your workload for GDP Compliance with 50% or more.

With our data-driven approach Validaide significantly accelerates Lane qualification and helps to optimize logistics decisions.

Validaide helps to reduce shipment incidents and to ensure shipments are executed according to plan.

## About Validaide

Validaide is the leading digital platform to optimize and streamline logistics planning for temperature-sensitive pharmaceutical products. Our solution consolidates digital Lane Risk Assessments and Standard Operating Procedures (SOPs) on a central platform to ensure compliance with Good Distribution Practice (GDP) Guidelines.

Validaide combines information from over 1200 logistics suppliers with other data sources to create a comprehensive risk overview per transport route. By facilitating digital collaboration with logistics partners and seamless planning-to-execution workflows, Validaide reduces incidents, improves efficiencies, and enhances flexibility to respond to supply chain disruptions, ultimately improving product quality and safety.
